

# Eva II™ (English)

## First Thing's First

Before pulling in your partner to play, try using Eva solo to see how it fits and works best for you. Keep in mind that Eva fits differently for different people!

We also recommend charging Eva before use.

## How to Place Eva

1. Place Eva where it feels best ;-)
2. Pull each labium (lip!) over one wing at a time
3. Adjust as necessary

Don't worry—it may take a few minutes and a couple of tries to get comfy.

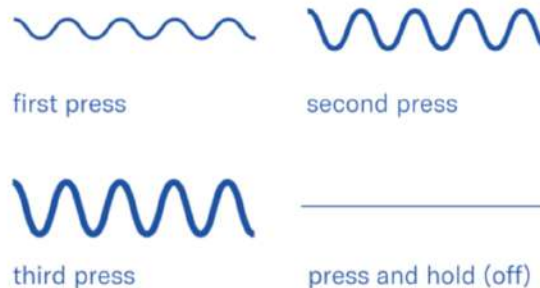

You can even try these adaptations:

No dice? No worries! Try shifting positions (e.g., lying back vs. sitting up, spreading your legs more), or ask your partner for a hand.

## Using Eva

Eva has a single button on top to control power.

Eva also has a Travel Mode, so that it won't turn on by accident. To activate, hold the button for 10 seconds; Eva will blink once per second and then blink red. To exit Travel Mode, place Eva in its charging base.

## Pro Tips

- Eva plays well with others: toys, strap-ons, penises, etc.
- Eva is totally waterproof, so take it for a swim! Or a shower. Or a bath.
- A single finger can help hold Eva in place while switching positions.
- Lube can make things more intense, but it might make Eva's wings slippery.
- For more pressure and security, try wearing panties over Eva (crotchless or otherwise).

### **Charging Eva**

Eva lasts for 5 straight hours on Low and 1 hour on High.

While plugged in, Eva will blink green, and will stay green when fully charged. On low battery, Eva will blink red.

### **Caring for Eva**

Always clean Eva after every use, using either soap and water, or a water-based sex toy cleaner. Store Eva separately from other toys, and away from extreme heat or cold.

### **Caution**

Do not overextend or twist Eva's wings.

Do not use silicone-based lube with Eva.

Do not clean Eva with products containing alcohol, petroleum, or acetone.

Do not boil, bake, microwave, or run Eva through the dishwasher.

Do not submerge the charging base in water; it's only water-resistant.
